WORK EXPERIENCE

KMINGDA PH

FEB 2025 - MAY 2025

IT Support | Web developer Intern

- Developed Express Inventory System, a system designed to provide a centralized and efficient platform for managing company assets, with built-in data analytics and asset distribution tracking. It allows users to easily monitor asset availability, detect missing items, and identify responsible handlers through distribution logs.
- Performed daily troubleshooting hardware, software, and network issues based on company support tickets.
